

DENK VISION AI Hub ONBOARDING PHASE

Your start into simple, AI-based image analysis.

Vision DENKweit

DENKweit, a Fraunhofer spin-off, has the vision to generate decisive added values for our partners and customers. We achieve this with an easy access to AI-based technologies in image analysis for simple and highly complex challenges.

Onboarding Phase in our VISION AI Hub includes:

- Access to the VISION AI Hub for 2 weeks
- Supervised training on your Use Case by our Customer Success Team
- Creation of your individual image analysis on a Use Case
- Easy and fast work with autoprediction
- Consultation and coordination on integration options in your environment
- Joint functional analysis of the created image evaluation with our Customer Success Team
- Intensive support with questions from our Customer Success Team

With the **Onboarding Phase**, we ensure for you that a **performing image evaluation** can be created accordingly for your **Use Case in the VISION AI Hub**. By offering intensive support, we are determined to achieve the **best results together with you**. In addition to solving your challenge, our goal is to **build a long-term partnership**.

If you have any questions or are interested, please contact us. We are gladly at your disposal.
